Admission Policy of Gunma University Graduate School

Admission policy

We accept students who have the academic ability and research skills required by each graduate school and by major, and who have research motivation to contribute to the development of human society through research and practical ability.

Admission Policy of Gunma University The Graduate School of Health Sciences (Doctoral Program)

— Our Doctoral Program is recruiting for the following applicants. —

<Human resource development goals>

1. To be able to conduct original or interdisciplinary research in the fields of health, medical care and welfare.
2. To be able to put into practice advanced education in the fields of health, medical care and welfare.
3. To become a leader in the the fields of health, medical care and welfare with high-level expertise and skills of health sciences.
4. To be able to provide guidance, education and conduct research in the international fields of health, medical care and welfare.

<Abilities and Qualities Required of Applicants>

1. Those who have expertise and research experience in health and medical care at the Master's program level.
2. Those who have communication skills and language proficiency necessary to promote research from a global perspective and to disseminate research outcomes widely.
3. Those who wish to contribute to society as researchers, educators, or highly skilled professionals in the the fields of health, medical care and welfare.

<Basic policy for admissions>

The department conducts the following entrance examination to select students with the above qualities, which is judged comprehensively based on an academic achievement test (in English), achievements including the thesis submitted at the completion of the master's course or academic papers presented as the first author, oral examination, and academic performance. In the oral examination, applicants are individually tested on their expertise and research ability.

○General Entrance Examination, Entrance Examination for Working Adults, and Entrance Examination for International Students

A test of foreign language (English) is used, and "the ability to read and understand English research literature" is evaluated (Abilities and Qualities Required of Applicants 2.) In addition, an oral examination is used to evaluate "specialized knowledge, research ability and research plan, as well as aptitude and motivation as a researcher or a professional with advanced expertise" (Abilities and Qualities Required of Applicants 1-3). In addition, the application documents will be added to the screening process to make a comprehensive judgment.

16 Special measures for educational method

We offer the day and evening courses system for students who have passed the entrance examination for working people, and those in employment who have passed the general entrance examination, if they wish.

Under the system, education is provided at night (from 6:00 p.m. to 9:10 p.m.), on Saturdays, Sundays and national holidays and during summer or other vacation period.

17 System for long-term degree completion

The system allows particular students such as students in employment who have difficulty completing the regular course within the formally-stated period of study (3 years) to extend the study period so that they can take and complete the courses systematically over the said period.

Students who would like to use the system need to consult with the supervisor and apply within the application period.

(1) Eligible students

- 1) Students in employment (or to be employed) who have difficulty sparing time to study or to take lessons due to business assignment,
- 2) Students who have difficulty sparing time to study or to take lessons due to household duties, childcare and/or nursing care,
- 3) Besides these, students who have reasons the Graduate School of Health Sciences approves for application of the said system.

(2) Long-term study period

The period adding one to three years to the formally-stated period of study (but the school days should not exceed twice as long as the said period of study).

(3) Tuition fee

The annual tuition fee for the long-term study period is the amount obtained by multiplying the number of years equivalent to the number of the formally-stated period of study (three years) to the prescribed annual tuition fee (JPY 535,800) and then being divided by the number of course term given for a long-term student.

(4) Application period Scheduled from February 17 (Wed.) to March 10 (Wed) , 2027.

(5) Documents to be submitted

- 1) Application form for the system for long-term degree completion
- 2) Curriculum/study plan under the system for long-term degree completion
- 3) Certificate of enrollment required for a student in employment
- 4) Other documents required by the Graduate School of Health Sciences
Refer to the guideline enclosed with the letter of acceptance for details.

(6) Inquiries :

Field of Laboratory Sciences

Region	Special Research	Contact Information	main contents of research
Basic Laboratory Sciences	Research on Molecular and Bio-information Sciences	Kenji Tago Ext. 8935 E-mail ktago @	We are investigating the novel regulatory mechanisms for signal transduction pathways involving heterotrimeric G proteins and Ras family small GTPases. Using research techniques including biochemistry, molecular biology, and cell biology, we also attempt to clarify the mechanisms how disordered activation of G protein signaling cause the onset of several diseases including cancer, heart disease, diabetes and so on. Our goal is to identify new disease markers and develop therapeutic agents.
		Takayuki Shibata Ext. 8977 E-mail tshibata@	Our main research theme is to create novel diagnostic methods based on the technology of Clinical Chemistry, through the development of color/fluorescent compounds that produce color/light under a certain condition and the development of chromogenic/fluorogenic reactions that react with a certain substance. Students will acquire knowledge and technique regarding high sensitive detection methods for minimal amount of analytes in biological samples.
Applied Laboratory Sciences	Research on Bio-information Sciences	Kazuhiro Nakamura Ext. 8943 E-mail knakamur@	Analysis of pathogenesis of neurodegenerative disorders
		Masanao Saio Ext. 8942 E-mail saio@	1) Analysis of cancer cells for nuclear morphological characteristics, amount of DNA, feature of nucleoli, and so on by utilizing mutation analysis, immunohistochemistry, image analysis and so on. 2) Analysis of cyto-morphological findings and characteristics of various cancer cells especially for cannibalism, emperipolysis, and entosis. 3) Basics of Paraffin-embedded tissue section preparation.
		Takayuki Saitoh** Ext. 8938 E-mail tsaitoh@	1. Elucidate the role of DNA repair genes in hematologic tumors such as multiple myeloma and acute myeloid leukemia, and develop novel therapies 2. Training of health science data scientists through health science big data analysis in collaboration with Gunma Prefecture
		Hiroki Matsui Ext. 8973 E-mail hmatsui @	<ul style="list-style-type: none"> • Effects of qualitative control of fatty acids on prevention and treatment of lifestyle-related diseases • Pathophysiological analysis using animal model of cardiac hypertrophy, atherosclerosis or pulmonary emphysema, etc. • Integrated risk assessment by combining physiological function tests with blood and urine tests

Field of Rehabilitation

Region	Special research	Contact Information	Main contents of research
Fundamental Rehabilitation Sciences	Research on Fundamental Rehabilitation Sciences	Takeshi Hisada* Ext. 8944 E-mail hisadat@	Research on the pathophysiology of respiratory diseases and the therapeutic effect on diseases, which rehabilitation should be applied, using physiological and biomolecular technique. One of the study target is the interaction between the effect of rehabilitation and omega-3 fatty acid-derived lipid mediators on respiratory inflammatory diseases, such as COPD, pulmonary fibrosis and asthma.
		Shinichi Mitsui** Ext. 8950 E-mail smitsui@	One of my research interests is the effects of pair bonding on psychological disorders and neurological diseases. We have been analyzing some kinds of disease models of monogamous prairie voles using ethological, pharmacological, and immunohistochemical techniques. Another research interest is molecular basis underlying intellectual disability. We have been investigating the functions of motopsin, the loss of which function causes sever intellectual disability in human, using genetically modified mice and cell biological techniques.
		Bumsuk Lee Ext. 8954 E-mail leebumsuk@	Research on Evaluation and intervention of Occupational Therapy especially for physical dysfunction. 1) Upper extremity function analysis using accelerometer and pressure sensors, 2) OT for visuospatial neglect after stroke, and 3) Evaluation of physical activity and sleep using Actiwatch.
		Yukio Fujita Ext. 8975 E-mail yfujita@	① Neuropathology of neurodegenerative diseases ② Gait analysis in neuromuscular disease
Applied Rehabilitation Sciences	Research on Applied Rehabilitation Sciences	Tsuyoshi Tajika Ext. 8945 E-mail tajika@	1. Ultrasonographic evaluation of musculoskeletal disorder 2. Epidemiological study of musculoskeletal disorder (Evaluation of risk factors for onset of musculoskeletal disorder) 3. Multi-faceted evaluation of physical therapy intervention in musculoskeletal disorder
		Takumi Kobayashi ◇ Ext. 8972 Email kobatakku@	1. Pathology of musculoskeletal and sports diseases 2. Development of physiotherapy assessment and intervention for musculoskeletal and sports diseases 3. Devising prevention methods for musculoskeletal and sports diseases
International/Community Health Rehabilitation Sciences	Research on International/Community Health Rehabilitation Sciences	Senichiro Kikuchi Ext. 8939 E-mail senichiro@	Researches on 1.Near Intra-Red Spectroscopy study for healthy volunteers and the people who have psychiatric problems, 2.development of cerebral activity examination suitable for occupational therapy, and3.neuropsychology tests for epilepsy
		Tetsuya Yamagami Ext. 8799 E-mail yamagami@	1. Rehabilitation for elderly people with dementia 2. Preventive long-term care and health promotion 3. Community-based rehabilitation
