Admission Policy of Gunma University Graduate School

Admission policy

We accept students who have the academic ability and research skills required by each graduate school and by major, and who have research motivation to contribute to the development of human society through research and practical ability.

Admission Policy of Gunma University The Graduate School of Health Sciences (Master's Program)

— Our Master's Program is recruiting for the following applicants. —

<Human resource development goals>

1. To understand holistic medical health care and to acquire advanced specialized skills and expertise.
2. To acquire basic skills to put into practice education and research in the specialized fields.
3. To be able to practice activities as healthcare or welfare professionals in the local community.
4. To be able to practice activities in the international fields of healthcare or welfare.

<Abilities and Qualities Required of Applicants>

1. Those who have knowledge and skills at the Bachelor's level required for the Master's course.
2. Those who have logical thinking skills, communication skills, and language proficiency necessary for research activities.
3. Those who wish to make social contributions as highly skilled professionals in the the fields of health, medical care and welfare.
4. Those who wish to enter the Doctoral program in health sciences after completing the Master's Program and become researchers, educators, or highly skilled professionals in health sciences.

<Basic policy for admissions>

The School conducts the following entrance examination to select students with the above qualities, and judgments are made based on the results of an essay, an academic achievement test in a foreign language, and an oral examination, as well as the applicant's submitted application documents, including transcripts and an outline of desired research.

○General entrance examination and entrance examination for working adults

An academic achievement test (essay and foreign language) is used to evaluate "knowledge and thinking skills in healthcare and medical care in general" and "English language skills in understanding English research literature" (Abilities and Qualities Required of Applicants 1 and 2). An oral examination is also used to evaluate "expertise, research skills and research plans, as well as aptitude and motivation as a researcher or a highly skilled professional" (Abilities and Qualities Required of Applicants 1-4). In addition, application documents will be added to the overall evaluation.

○International student entrance examination

A test of foreign language proficiency (English) is used to evaluate "competence in understanding English research literature" (Abilities and Qualities Required of Applicants 2). An oral examination is also used to evaluate "expertise, research skills and research plans, as well as aptitude and motivation as a researcher or a highly skilled professional" (Abilities and Qualities Required of Applicants 1-4). In addition, application documents will be added to the overall evaluation.

16 Special measures for educational method

We offer the day and evening courses system for students who have passed the entrance examination for working people, and those in employment who have passed the general entrance examination, if they wish.

Under the system, education is provided at night (from 6:00 p.m. to 9:10 p.m.), on Saturdays, Sundays and national holidays and during summer or other vacation period.

17 System for long-term degree completion

The system allows particular students such as students in employment who have difficulty completing the regular course within the formally-stated period of study (2 years for master's course) to extend the study period so that they can take and complete the courses systematically over the said period.

Students who would like to use the system need to consult with the supervisor and apply within the application period.

(1) Eligible students

- 1) Students in employment (or to be employed) who have difficulty sparing time to study or to take lessons due to business assignment,
- 2) Students who have difficulty sparing time to study or to take lessons due to household duties, childcare and/or nursing care,
- 3) Besides these, students who have reasons the Graduate School of Health Sciences approves for application of the said system.

(2) Long-term study period

The period adding one year or two years to the formally-stated period of study (but the school days should not exceed twice as long as the said period of study).

(3) Tuition fee

The annual tuition fee for the long-term study period is the amount obtained by multiplying the number of years equivalent to the number of the formally-stated period of study (two years) to the prescribed annual tuition fee (JPY 535,800) and then being divided by the number of course term given for a long-term student.

(4) Application period scheduled from February 17 (Wed.) to March 10 (Wed.), 2027.

(5) Documents to be submitted

- 1) Application form for the system for long-term degree completion
- 2) Curriculum/study plan under the system for long-term degree completion
- 3) Certificate of enrollment required for a student in employment
- 4) Other documents required by the Graduate School of Health Sciences

Refer to the guideline enclosed with the letter of acceptance for details.

2 Course for Certified Nurse Specialist (CNS)

Our graduate school is a certified educational institution which students can get qualification in the fields of cancer nursing, chronic care nursing and maternal nursing to take the CNS test.

In the CNS course, students need to complete six to ten credits in the clinical training. They also need to complete 38 credits in cancer nursing. The chronic care nursing and maternal nursing field are now change its course requirements from the year of 2020, in which students need to complete 38 credits.

See the website of the Japanese Nursing Association (<https://www.nurse.or.jp>) for CNS.

(Note) A person who desires to take this course should consult his/her Academic Adviser and submit the application.

3 The Cancer Professionals Training Course

This training has three courses (1. Multidisciplinary Collaboration to Support Cancer Treatment, 2. Promotion of Cancer Data Science, 3. Cancer Treatment Innovation) to cultivate human resources specialized cancer medical services meeting multiple needs.

(Note) A person who desires to take the course should consult with Academic Advisers of Cancer or Pediatric Nursing prior to application.

4 Clinical Research Coordinator (CRC) administrator course

The course aims to educate “clinical research professionals” with advanced knowledge and skills required for clinical researches to implement and lead a high-quality clinical research. Students who would like to take the course need to consult with the advisor.

* See the brochure of our Graduate School of Health Sciences for requirements for completion, career options of those who complete graduate school and subjects.
